Obagi Nu-Derm® Hydrate™

We're proud to announce the arrival of a new facial moisturizer that definitely lives up to the Obagi name, Obagi Hydrate!

Hydrate isn't just an ordinary lotion. It is formulated to provide long-lasting hydration for all-day moisture protection. It contains Hydromanil, a technologically advanced ingredient, which retains water and gradually delivers moisture to the skin. So not only does it provide immediate moisturization, it also continues to hold water in the layers of your skin over time. In fact, as demonstrated in a moisturization study, Hydrate provides 8-hour moisture protection.

This gentle, hypoallergenic formula also contains natural ingredients such as shea butter, mango butter, and avocado to help combat skin dryness without clogging your pores. Designed for all skin types, Hydrate is dermatologist-tested to be non-irritating and non-sensitizing.

Add this light-weight, but powerful moisturizer to your regular skin care regimen. Apply Hydrate in the morning and evening to help protect your skin. For optimum results try Hydrate as part of the Obagi Nu-Derm® System—especially if you are experiencing dry, flaky skin. Hydrate will help provide relief and comfort as your skin undergoes transformation.

Available at Parkinson Dermatology.
